DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Stiles (U.S. Pat. No. 3,120,146).

Regarding claim 8, Stiles discloses: a keyboard device for a keyboard musical instrument (Fig. 1), comprising: keys (26) each opening downward, and having side walls and a front wall (Figs. 2 and 4), and an abutment portion (Figs. 4 and 5, the partitions which form the two slots parallel to the side walls and for receiving the

projection 35 between them) provided inside said side walls and formed inside of the front wall of said keys (Figs. 4 and 5; col. 3, lines 38-42), said abutment portion having a lower end located at the same height as lower ends of said side walls (Figs. 4 and 5, said partitions have lower ends flush with the lower ends of the side walls), said keys each performing pivotal downward motion when depressed (col. 2, lines 41-59); and stoppers (Fig. 1, element 9) arranged under said keys in a manner associated therewith, respectively, for abutment of said side walls and said abutment portion of an associated one of said keys thereagainst, thereby stopping the downward pivotal motion of said associated key, said stoppers having a shock-absorbing property (Fig. 1; col. 2, lines 58-59), wherein said abutment portion (the partitions which form the two slots parallel to the side walls and for receiving the projection 35 between them, but not including 35 or 33) is formed by at least one plate-shaped rib extending from said side walls and having a contiguous lower surface extending along a plane including lower end faces of said side walls (see Fig. 4, the ribs are integrally molded with the side walls) and wherein the lower surface includes a largest surface area of the plate-shaped rib (in the embodiment shown in Figs. 4 and 5, the ribs have uniform thickness in vertical direction), and coming into surface abutment with said stoppers (Figs. 4 and 5; col. 2, lines 31-35).

Regarding claim 9, Stiles discloses: wherein said keys are formed by synthetic resin molded articles in which each key is integrally molded with said rib (col. 2, lines 31-35).

Regarding claim 10, Stiles discloses: wherein said lower surface of said rib is flush with said lower end faces of said side walls (Figs. 4 and 5).

Response to Arguments

4. Applicant's arguments received 06/21/07 with respect to claims 8-10 have been considered but are moot in view of the new ground(s) of rejection.

Amended claims 8-10 are rejected as new grounds have been found from the Stiles reference to teach the limitations argued by the Applicant. Detailed response is given in section 3 as set forth above in this Office Action.

Contact Information

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jianchun Qin whose telephone number is (571) 272-5981. The examiner can normally be reached on 8am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lincoln Donovan can be reached on (571) 272-1988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
